Options to improve image capture

Source: <https://www.eizo.lv/knowledge/monitor-expertise/age-of-hdr/>

Achievements:

- ❖ **Camera data rate doubled**
 - Up to five times higher resolution for finer details
 - Up to eight times higher frame rate for faster processes
- ❖ **Resolution doubled** in scanner for **20% frame rate increase**
- ❖ **Dynamic range doubled**
- ❖ **20% larger area coverage**
- ❖ **Automated ROI segmentation of Electron Microscopy images** reducing **annotation effort from 8 hours to 5 minutes**

TNO

Improved
focus assist

UHDTV slow motion camera
for remote productions

Ethernet (IP)
transmission

UHDTV slow motion
replay server

Achievements:

- ❖ New functionality: **4K 3-speed** slomo recording & playback
- ❖ **Doubled dynamic range**
- ❖ **1 F-stop more sensitive**
- ❖ Multiple video standards at the same time
- ❖ Remote productions:
 - Can halve carbon footprint ⁽¹⁾.
 - Can save 35% in TCOO ⁽²⁾.
 - Improved social live

HS-based field level-management to optimize food production

Demonstration setup

Separation of crop and weed using deep learning algorithm

Achievements:

- ❖ **Increased the spectral bandwidth** for better separation of plants and weeds: upper limit from 700nm to **940nm**
- ❖ **Doubled the frame rate** for faster analysis with moving tractor
- ❖ Deep learning algorithm with 100% accuracy in separating 5 plants and 5 weeds

Results for in-cabin safety in automotive

AMS demo kit with NIR-enhanced sensor combined with a NIR light source

Achievements:

- ❖ Sensitivity in near infrared more than doubled
- ❖ Smaller (2.8 μ m) global shutter pixel for better resolution
- ❖ Drowsiness detection demonstrator for potential customers

Thank you for your attention!
