

# SME Roundtable

Moderated by Peter Connock  
Board Chairman, memsstar

**LECS** Our  
digital  
future  
2018

Organised by:  
AENEAS, ARTEMIS-IA, EPoSS, ECSEL-JU &  
European Commission

Associated organiser:  
EUREKA

# SME roundtable panelists

Our digital  
future

ECSEL Joint Undertaking  
Electronic Components and Systems for European Leadership

# SME Involvement - Why does it matter?

Arco Krijgsman  
Senior Manager  
Strategic  
Technology

# ASML

## Our digital future

**Innovative  
technology from  
SME's...**

Selection of 16 different SME's in past 5 projects out of a total of 48 participating SME's

...has helped enable Moore's law for over the past 20 years...

| Funding program            | 2000's   | 2010's     | > 2020    |
|----------------------------|----------|------------|-----------|
| ECSEL JU                   |          |            | TAPES3    |
| eniac<br>JOINT UNDERTAKING |          |            | TAKEMIS   |
|                            |          |            | TAKE5     |
|                            |          |            | SeNaTe    |
|                            |          |            | E450LMDAP |
|                            |          |            | E450EDL   |
|                            |          | EEM450PR   |           |
| CATRENE                    |          | EEM450     |           |
|                            |          | LENS       |           |
| Sixth Framework Programme  |          | EXEPT      |           |
|                            |          | More Moore |           |
| MEDEA+                     |          | EAGLE      |           |
|                            |          | EXTUMASK   |           |
|                            |          | EXTATIC    |           |
|                            |          | EXCITE     |           |
| esprit                     | EUCLIDES |            |           |

Legend:

- Led by ASML
- Led by other partner

In all projects on average ~20% SME's

**...and 1/3<sup>rd</sup> of those initial SME's are now Large Enterprise**

### Analysis of current status of project partners with initial SME status upon FPP submission

RECIF Technologies designs, manufactures, distributes and services robotic handling equipment for highly sensitive environments dedicated to end users & OEM's of the semiconductor industry

Customer orientated and pro-active, RECIF Technologies keeps a strong focus on highest product quality coupled with customer satisfaction

Acknowledged as expert in wafer handling and innovative solutions, we firmly believe that building strong partnerships with companies mastering complementary core competences, will lead us together to excellence, and better serve the industry

Alain Jarre  
CEO

Mateusz Bonecki PhD  
CIO

DAC is an IT solutions provider for mobility, transportation, and value network digitalization.

We combine expertise in IoT, data analytics, and enterprise architecture to help our clients with supply chain transparency, product traceability, and logistics optimization.

Miguel Roncales  
Founder and CEO

AlphaSIP's main goal is to design, develop and produce molecular diagnostic chips that allow immediate and effective illness detection, promoting better health services for patients and great advances towards personalized medicine

Dr Stefan Mengel  
Head of Division  
“Electronics; Autonomous  
Electrical Driving”  
BMBF

- Electronic Components and Systems is a priority area for Germany
- Significant funding for research over 2016-2020
  - Collaborative research projects – 400 M€
  - Research Labs and Research Fab Microelectronics Germany – 400 M€
- Germany plans participation in IPCEI
  - 1000 M€ from the Federal Ministry for Economic Affairs and Energy.

# SME Survey Learnings

# SME survey background

- Initiated early 2018
- Many actors jointly defining and distributing questionnaire
  - Industry associations: AENEAS, ARTEMIS-IA, EPoSS, SEMI
  - Funding programmes and organisations: EC, ECSEL, EUREKA
  - Regional clusters: ARCSIS, DSP Valley, Minalogic, SCS, Silicon Saxony, Systematic
- Online survey took place during Q2 2018

# Typology of Survey Respondents

ECS 2018

Our digital future

Respondents per Headquarter Country

- 216 Respondents, mostly with previous participation in several proposals
  - 17% with no previous participation
- Most used funding instruments: H2020, ECSEL and FP7 – Then Eurostars
- EUREKA Clusters less known
- About half of respondents below 50 employees and 2M€ sales
- 25 countries represented
  - 60% located in a single country
- Over 75% of respondents spend 10 to 100% of sales in R&D

**Do you see potential / benefit from international collaboration? Overwhelmingly “Yes”**

# Motivation for international collaboration

ECS 2018

Our digital

Good or considerable benefit

for over 70% of respondents

for between 60 and 70% of respondents

# Preferred participation format

ECS2018

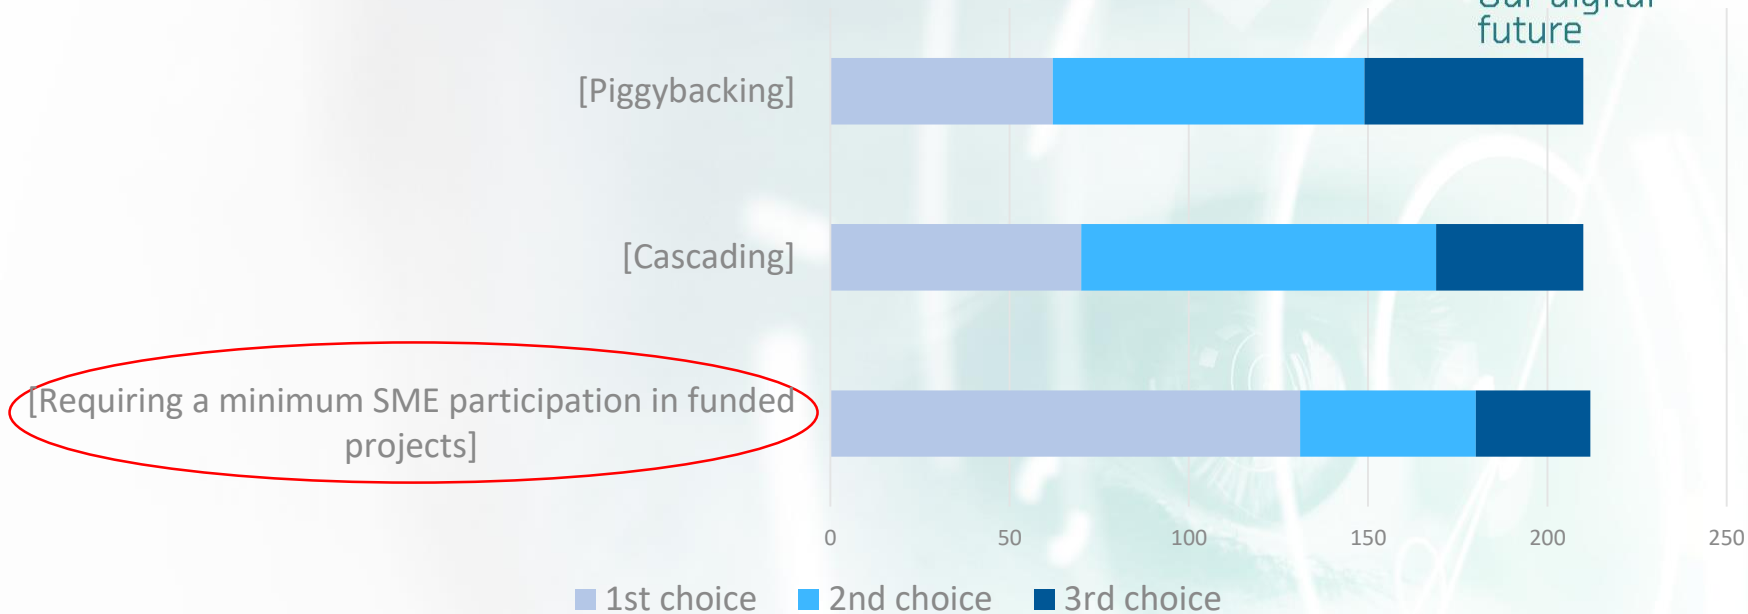

Our digital  
future

# Assessment of proposed mechanisms to help SME engagement

Rating from 1 (useless) to 7 (quite useful)

**Cascading:** Within a collaborative project, a source of funding is provided funding, with the specific obligation to transfer that funding to SMEs who become involved in the project (the SME is not applying for funding itself)

**Piggybacking:** SME's can have the option to join a running project to bring additional expertise to the project team. Funding would be provided through a separate national application

# What kind of support would you need?

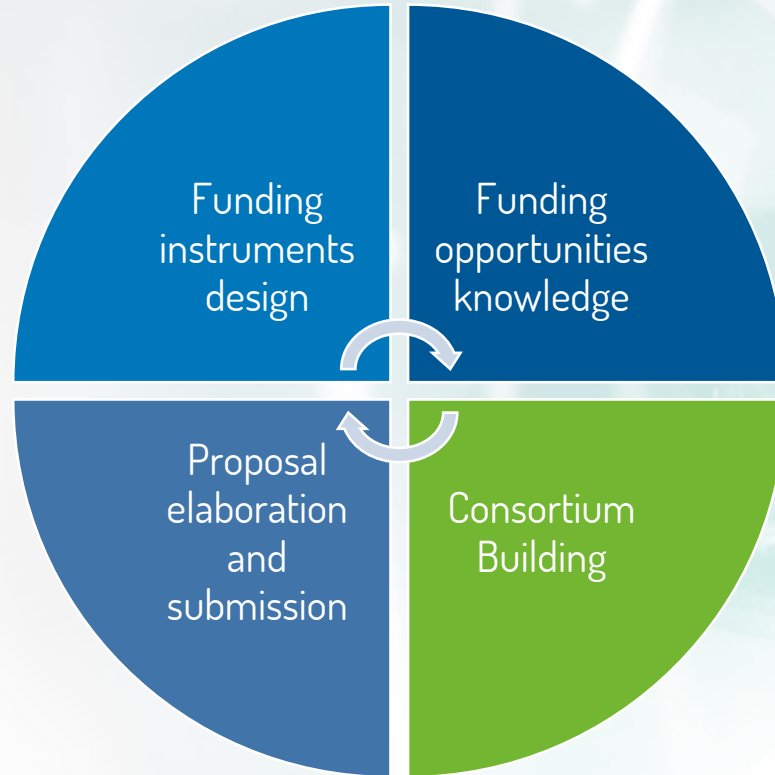

# Hurdles to SME participation

Number of respondents

# Room for improvement

Thank you!
